Classified of S. W. Borker
McIntyre*

Wrapped cord

Loop twine basket:

Sample: 3.

Form: These are all small fragments but the curvature of the stick leads me to believe these baskets were deep conical bowls or containers.

Dimensions: Maximum diameter: 2 to 3 mm.

Stitch width: 2 to 5 mm.

Six to 7 loops per inch (vertically)

Four to 6 rods per inch.

Technique: This is a series of vertical rods (perhaps attached or folded at the base) that are linked together by yucca strands looped once or twice around them to form horizontal bands. The loops of each band are looped on opposite sides of the main strand.

Use: Basket or sifter.

Temporal or Geographical Range: Southwest Tamaulipas, 5000 to 7000 B.C.

RECEIVED

LIBRARY

PHYSICS DEPARTMENT

CHICAGO, ILLINOIS

Gourd containers:

Sample: 13.

Form: The one complete specimen, from burial, has its neck cut off to form a gourd water(?) bottle. All the other twelve pieces are cut neck fragments.

Temporal and Geographical Range: These occurred in southwest Tamaulipas from 4000 B.C. to 1750 A.D. and the presence of gourd fragments (which were not cut) leads to the suspicion that they probably began even earlier.

Fuegian basket:

Sample: 2 (the earlier one being only a small section of the stitch).

Form: One is probably large pan-like basket.

Dimensions: Yucca or palm stitch width: 3 to 4 mm.

Bundle diameter: about 4 mm.

Loops per inch: about 3.

Bundles per inch: 2 or 3.

Technique: Fuegian-type baskets. Basically this is simple coil-netting technique

but with the loops going around a bundle foundation as well as catching the (super
coiling
strands between the loops on the next row above which lie on top of the bundle.

Temporal and Geographical Range: These have a peculiar historic spatial range as they occurred in Terra de Fuego, San Salvador, and Costa Rico. In southwest Tamaulipas they occurred from 4000 to 1400 B.C.

Fuegian twisted basket:

Sample: 1 (five small pieces of, I believe, the same basket).

Form: Probably large pan-like basket.

Dimensions: Yucca stitch width: 3 mm.

Bundle diameter: 5 mm.

Loops per inch: 3.

Bundles per inch: 2.

Technique: This is much like the Fuegian technique with the loop going around the bundle above but the strand between the loop of the above row of stitches not only are caught by the lower loop but also go down under the bundle below thereby catching it.

Temporal and Geographical Range: Terra de Fiango² and Tamaulipas. In Tamaulipas from 1400 to 1800 B.C.

Plain split-stitch bundle foundation pan:

Sample: 4.

Form: Large pans.

Dimensions: Width of yucca stitch: 3 to 5 mm.

Diameter of bundle: 6 to 8 mm.

Stitches per inch: 4 to 5.

Bundles per inch: 4 to 5.

Diameter of tray: 400 to 460 mm.

Approximate depth: 80 to 100 mm.

Technique: Split stitch woven into a bundle foundation from lower right to upper left.

Temporal and Geographical Range: In southwest Tamaulipas from 1800 B.C. to 1450 A.D.

Plain split-stitch bundle foundation bowl:

Sample: 11.

Form: Small steep-sided bowls with slightly incurved mouths.

Dimensions: Yucca stitch width: 3 to 8 mm.

Bundle diameter: 4 to 8 mm.

Stitches per inch: 3 - ~~4~~ - 8.

Bundles per inch: 3 to 5.

Approximate diameter of bowl: 100 to 300 mm.

Approximate depth of bowl: 60 to 180 mm.

Technique: Split-stitch woven into a bundle foundation from lower right to upper left.

Temporal and Geographical Range: Southwest Tamaulipas, from 1800 B.C. to 1750 A.D.

Decorated split-stitch bundle foundation bowl:

Sample: 6.

Form: Small steep-sided bowls with slightly incurved mouths.

Dimensions: Yucca strand stitch width: 2-3 mm.

Bundle foundation diameter: 4-6 mm.

Stitches per inch: 10 to 12.

Bundles per inch: [?]6.

Bowl mouth diameter: 90 - 160 - 180 - 260 mm.

Bowl depth: 60 - 90 - 135 mm.

Technique: Split-stitch bundle foundation with 4 to 7 concentric circles made by sewing in one or two strands of [?]black stitch. One with diagonal between inner [?]circles. Black lines about an inch apart with 6 [?]spirals at bottom or 2 [?]stars made circles.

Decorated Split stitch bundle Foundation bowl

Sample 6

Form - Small steep sided bowl with slightly incurved mouth.

Dimensions - Yucca strand, ^{stitch} width 2-3
Bundle Foundation diameter 4-6
stitch per inch 10-12
stitches per inch 6
bowl mouth diameter 40 - 160 - 180 - 260
bowl depth 60 - 90 - 135

Technique - Split stitch bundle foundation with 4 ^{or 5} concentric
circles made by sewing ^{one at time} in ^{between inner circles} strands of black stitch. One
week designed of black lines about mid spread with 6 up to at
bottom or 2 stars made circles

Decorated split-stitch bundle foundation pan:

Sample: 1.

Form: Large shallow pan.

Dimensions: Yucca stitch width: 4.5 mm.

Bundle diameter: 8 mm.

Stitches per inch: 5-6.

Bundles per inch: 4-5.

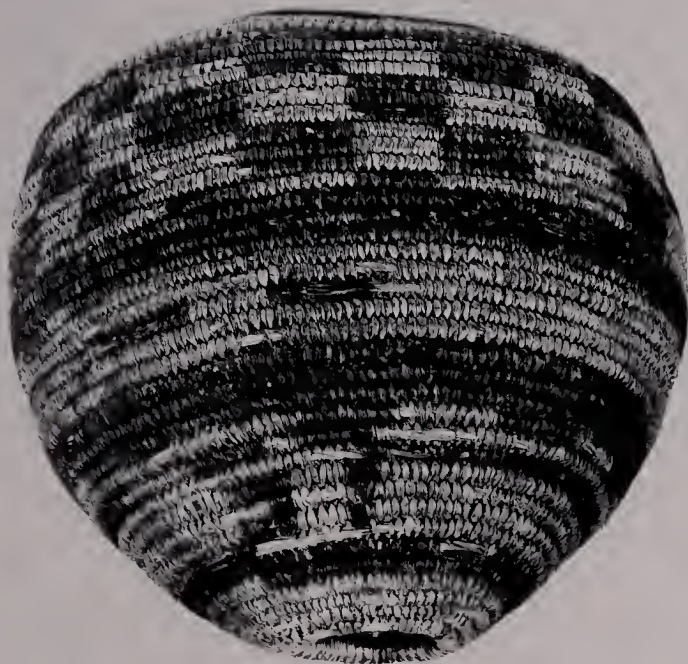

Diameter: 480 mm.

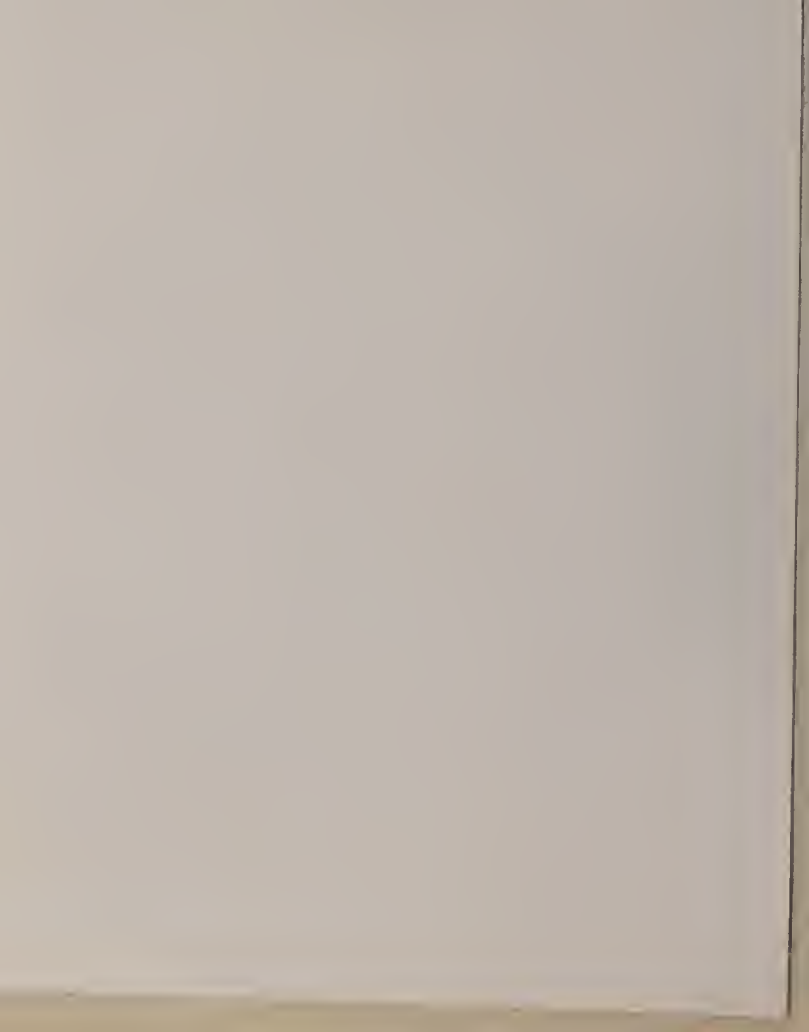

Depth: 75 mm.

Technique: Split-stitch bundle technique with five concentric circles, by weaving in two to three rows of black stitches about 40 mm. apart.
